

NL02

User study: LLM-generated natural language explanations (NLE)

Thank you for participating in this user study. The purpose of this questionnaire is to evaluate the quality of natural language explanations generated by large language models (LLMs). In this study, you will be shown short text samples, which may or may not be anonymized. For each sample, you will be asked to assess the quality of a corresponding explanation based on several criteria.

Your responses will help us understand how humans perceive the quality of LLM-generated explanations.

The questionnaire should take only a few minutes to complete. Your answers will be kept anonymous and used solely for research purposes.

1. How would you assess the quality of the generated explanation of the following input?

NE01

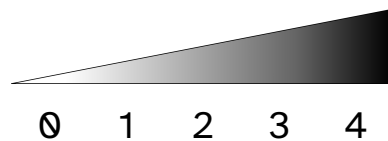

Input:

Susan Grace Calman (born 6 November 1974) is a Scottish comedian and panellist on BBC Radio 4 topical shows The News Quiz and I Guess That's Why They Call It The News. She appeared in Channel 4 sketch shows and was one of the relief presenters for Fred MacAulay on his BBC Radio Scotland show MacAulay and Co which ran until March 2015. She has also appeared in Rab C.

Nesbitt. Calman is a regular at the Edinburgh Festival Fringe and at The Stand Comedy Club. Other television work includes presenting the CBBC programme Extreme School and providing the comic voiceover on the CBBC series Disaster Chefs. She played the "sandwich lady" frequently throughout Series 5 of Dani's House, and presented a quiz show called The Lie on STV. She is currently a team captain on the BBC Northern Ireland comedy panel show Bad Language. Since 2016, she has hosted the game show Top Class.

Explanation: "This text is classified as not anonymized because it contains specific personal information about Susan Calman, such as her full name, date of birth, nationality, occupation as a comedian, and details about her career and television appearances. These details make it possible to identify the individual being discussed, therefore it is not anonymized."

2. How would you assess the quality of the generated explanation of NE02 following input?

Input:

A person (Date of Birth – Date of Death) was a professional from a continent and the initiator of a notable enterprise. This individual was known for their exceptional skill and was described as ‘the master of us all’ by a respected industry peer and as ‘the only true artisan in their field’ by another influential figure, who remarked ‘The others are simply professionals’. This individual is still honored as a distinguished figure in their industry. On the day of this individual’s passing, a major publication ran the headline ‘The king is dead’ (the community knew who was meant). Since a year in the 21st century, a dedicated exhibition space displays works of this individual in their hometown. A number of items in the collection were provided by this individual’s apprentice and patrons including notable personalities.

Explanation: “This text is classified as anonymized because the specific name of the person, their date of birth and death, the continent they were from, the enterprise they initiated, and the industry they were in have all been replaced with placeholders in square brackets. This anonymization process removes any identifying information about the individual being described, making it impossible to determine their true identity.”

The explanation contains no hallucinations.

3. How would you assess the quality of the generated explanation of the following input?

NE03

Input:

A person (born in the second half of the 20th century) is a former competitive driver. This individual competed in a premier motor racing series for an extended period, securing top positions in the series standings on several instances, and was part of a renowned team. The driver achieved a series of victories, numerous high placements, and was frequently among the front runners in qualifications. With a substantial tally of race participations, this person is considered highly experienced within the racing community. They led various races and had a fair share of retirements. The driver's initial and concluding triumphs were notable for a certain team, with a long interval in between. Successes were also recorded with other leading teams. In one phase with a team, the driver worked with a notable figure in racing, aiding in the team's achievements in the series championships during a certain era. In the early 21st century, the individual had ownership interest in a Formula One team.

Explanation: “This text is classified as anonymized because it does not provide any specific names or identifying information about the person being described. Instead, it uses generic terms such as “[person],” “[individual],” and “[they]” to refer to the individual in question. Additionally, any specific details that could potentially reveal the person’s identity, such as the names of racing series, teams, or notable figures, are replaced with generic terms like “[premier] [motor] racing series,” “renowned team,” and “notable figure in racing.” This anonymization process ensures that the person’s identity remains confidential.”

4. How would you assess the quality of the generated explanation of the following input?

NE04

Input:

Warren Joseph Duffey (January 24, 1886 – July 7, 1936) was a U.S. Representative from Ohio. Born in Toledo, Ohio, Duffey attended the public schools. Duffey graduated from St. John's University in Toledo, Ohio, in 1908 and from the law department of the University of Michigan at Ann Arbor in 1911. Duffey was admitted to the bar the same year and commenced the practice of law in Toledo, Ohio. Duffey served in the Ohio House of Representatives in 1913 and 1914 and as a member of the Toledo City Council in 1917 and 1918. He served as chairman of the Lucas County Democratic central committee from 1919 and 1932 and was a delegate to the 1932 Democratic National Convention. Duffey was elected as a Democrat to the Seventy-third and Seventy-fourth Congresses and served from March 4, 1933, until his death. He was an unsuccessful candidate for renomination in 1936. Duffey died in Toledo, Ohio on July 7, 1936. He is interred in Calvary Cemetery.

Explanation: “This text is classified as not anonymized because it contains specific personal information such as the full name of the individual (Warren Joseph Duffey), their birth and death dates (January 24, 1886 – July 7, 1936), their occupation (U.S. Representative from Ohio), their education background, political affiliations (Democrat), and details about their career and political activities. Additionally, specific locations such as Toledo, Ohio, St. John’s University, University of Michigan, and Calvary Cemetery are mentioned, further identifying the individual.”

5. How would you assess the quality of the generated explanation of NEQ5 following input?

Input:

An individual (born in a certain decade) is a retired professional athlete, a former event organizer and the current executive of a major sports association. On an unspecified date, this individual was appointed as the executive to succeed a predecessor who passed away due to an illness. This person's term started in a recent decade, and they are based in the association's office in a European city. Having been involved in a sport for over three decades, this individual began a modest career as an athlete, transitioning to a coaching role in a European city, and later served as the organizer of a notable sports event. In a span of several years, this person was the organizer of a significant annual event. Moreover, this person has experience in the broader entertainment sector. Before being appointed by the sports association, this individual sought an executive position at a national sports federation but was not selected.

Explanation: “This text is classified as anonymized because it does not provide any specific names or identifying information about the individual being described. Instead, it uses generic terms such as “[an] individual,” “[a] certain decade,” and “[a] major sports association” to refer to the person in question. Additionally, the text uses square brackets to replace important identifying details such as the individual’s name, the specific sport they were involved in, the city they are based in, and the specific event they organized. This anonymization technique helps protect the individual’s privacy and confidentiality while still providing relevant information about their career and background.”

The explanation contains no hallucinations.

6. How would you assess the quality of the generated explanation of the following input?

Input:

Claude Nicollier (born 2 September 1944 in Vevey, Switzerland) is the first astronaut from Switzerland, and has flown on four Space Shuttle missions. His first spaceflight (STS-46) was in 1992, and his final spaceflight (STS-103) was in 1999. He took part in two servicing missions to the Hubble Space Telescope (called STS-61 and STS-103). During his final spaceflight he participated in a spacewalk, becoming the first European Space Agency astronaut to do so during a Space Shuttle mission (previous ESA astronauts conducted spacewalks aboard Mir, see List of spacewalks and moonwalks 1965–1999). In 2000 he was assigned to the Astronaut Office Extravehicular Activity Branch, while maintaining a position as Lead ESA Astronaut in Houston. Nicollier retired from ESA in April 2007. He was appointed full professor of Spatial Technology at the École Polytechnique Fédérale de Lausanne on 28 March 2007. He is an expert board member of Swiss Space Systems.

Explanation: “This text is classified as not anonymized because it contains specific personal information about Claude Nicollier, including his full name, date and place of birth, career as an astronaut, specific space shuttle missions he participated in, his retirement date, and his current position as a professor at a specific institution. These details are unique to Claude Nicollier and can easily identify him.”

7. How would you assess the quality of the generated explanation of the following input?

NE07

Input:

Ajla Tomljanović (born 7 May 1993) is a Croatian-Australian professional tennis player. Tomljanović has won four singles and three doubles titles on the ITF tour in her career. On 23 Feb 2015, she reached her best singles ranking of world No. 47. On 20 October 2014, she peaked at world No. 48 in the doubles rankings. Tomljanović was an accomplished junior player, having won the 2009 Australian Open Girls' Doubles title with Christina McHale. She would also reach her combined career high junior ranking of world number 4 on 30 March 2009. In July 2014, it was announced that Tomljanović would take Australian citizenship and begin competing for Australia at the 2014 US Open. She will continue to represent Croatia at all non-Grand Slam events until she receives an Australian passport, which will enable her to represent the country at Grand Slam and non-Grand Slam tournaments alike.

Explanation: “This text is classified as not anonymized because it contains specific personal information about a professional tennis player, Ajla Tomljanović, including her date of birth, career achievements, nationality, and career decisions. The text also includes important dates and rankings related to her tennis career, as well as details about her junior career and citizenship change. The use of specific names, dates, and rankings makes it easy to identify the individual being discussed, therefore it is not anonymized.”

8. How would you assess the quality of the generated explanation of the following input?

NE08

Input:

Andrzej Grubba (May 14, 1958 in Brzeźno Wielkie – July 21, 2005 in Sopot) was a Polish table tennis player. Grubba was born in Brzeźno Wielkie near Starogard Gdański. He was the recipient of numerous medals for the world competition in table tennis as well as for the European competition. He was one of the best players in this field of sport in Polish history, together with Alojzy Ehrlich. Three times he was awarded bronze medals during the World Competition – in 1989 for single play, in 1985 for team tournament, in 1987 for double play with Leszek Kucharski. Three times Grubba took part in the Olympic Games. In 1988 he won World Cup, in 1985 and 1989 he had 2nd place and in 1987 he was 3rd, in singles. In doubles Cup, with Leszek Kucharski had 3rd place. One of the things Grubba was best known for was his ability to change playing hands mid-rally. He died of cancer leaving his wife and two children.

Explanation: “This text is classified as not anonymized because it contains specific personal information about a well-known individual, Andrzej Grubba, including his full name, date and place of birth, date and place of death, career achievements, family details, and unique playing style. These details make it easy to identify the individual being discussed, therefore it is not anonymized.”

9. How would you assess the quality of the generated explanation of the following input? NE09

Input:

Thomas Keller (born October 14, 1955) is an American chef, restaurateur, and cookbook writer. He and his landmark Napa Valley restaurant, The French Laundry in Yountville, California, have won multiple awards from the James Beard Foundation, notably the Best California Chef in 1996, and the Best Chef in America in 1997. The restaurant is a perennial winner in the annual Restaurant Magazine list of the Top 50 Restaurants of the World. In 2005, he was awarded the three star rating in the inaugural Michelin Guide for New York for his restaurant Per Se, and in 2006, he was awarded three stars in the inaugural Michelin Guide to the Bay Area for The French Laundry. He is the only American chef to have been awarded simultaneous three star Michelin ratings for two different restaurants. He currently holds 7 Michelin stars total: 3 at Per Se, 3 at The French Laundry, and 1 at Bouchon.

Explanation: "This text is classified as not anonymized because it contains specific names such as "Thomas Keller," "October," "an," "he," "California," "James Beard Foundation," "New York," "Bay Area," "Per Se," "French Laundry," and "Bouchon." These names and details provide specific information about a particular individual (Thomas Keller) and his achievements, making it non-anonymous."

10. How would you assess the quality of the generated explanation of the following input?

NE10

Input:

Ronald Anthony Parise Ph.D. (May 24, 1951 – May 9, 2008) was an Italian American scientist who flew aboard two NASA Space Shuttle missions as a payload specialist. Parise was born in Warren, Ohio to Henry and Catherine Parise. By age 11, he became a licensed amateur radio operator. In his teens, he developed an interest in astronomy and aviation and became a pilot. He attended Western Reserve High School, graduating in 1969 before attending Youngstown State University. In 1973, he obtained a bachelor of science degree in physics, with minors in mathematics, astronomy, and geology. He went on to receive a master's degree in 1977 and a doctorate in 1979 from the University of Florida, both in astronomy. He and his wife Cecelia Sokol Parise had two children. Parise died from a brain tumor on Friday, May 9, 2008 at the age of 56.

Explanation: “This text is classified as not anonymized because it contains specific personal information about Ronald Anthony Parise, including his full name, birthdate, nationality, profession, education history, family members, and date of death. These details make it possible to identify the individual being discussed.”
